Item	Test Result	Conclusion	Ref Range
FPV-Ag	<4Tu/ml	-	<div><div>0Tu/ml</div><div>8Tu/ml</div><div>15Tu/ml</div><div>40Tu/ml</div><div>200Tu/ml</div></div> <div><div></div><div></div><div></div><div></div><div></div></div> <div><div>negative</div><div>suspicious</div><div>Weak Yang</div><div>Positive</div></div>

Item	Clinical Significance
FPV-Ag	Feline distemper virus (FPV-Ag) is a kind of virus in the genus Parvoviridae and is a highly contagious viral disease. It is mainly transmitted through contact with infected urine or by blood-sucking insects and fleas. Clinical symptoms include high fever, a sharp decrease in white blood cells, depression, decreased appetite, vomiting, diarrhea, and hemorrhagic enteritis.

This result is for clinical reference only, not as a basis for diagnosis!
